**intrAtrain™ Safety** is a library of online, facilitator led, and blended learning safety training courses that focuses on employee health and safety performance by influencing and standardizing employee actions, behaviors, and practices to **reduce accidents and incidents**. It's not easy to put a price-tag on safety, but accidents and injuries cost thousands of dollars and non-compliance with regulations and certifications is costly.

intrAtrain™ Safety is an **investment in your company**, but equally important, it is an investment in your employees and their families. The interactive and engaging modules provide a comprehensive and credible method to ensure your employees are always up to date with their safety training. The courses are very flexible and affordable which allows them to easily meet your company's specific needs. They can also be customized to meet your specific requirements.

**Features and Benefits**

intrAtrain™ Safety is training geared to individual and group learning that helps modify employee behavior and practices directly related to the safe operation of facilities and equipment. With intrAtrain™ Safety, you are taking a **proactive approach to safety risk management**. You are creating a safety-first culture with your employees and a focus on workplace safety. Most courses are also available in Spanish.

intrAtrain™ Safety training is available 24/7. It is efficient and cost-effective. It can result in:

- Better trained employees
- Improved and safe work practices
- Increased productivity
- Safer workers
- Reduced risk
- Lower costs
- Increased morale
- Defensible training records
- And much, much more

If it is important to you – if it is important to your employees and their families to improve workplace and occupational safety and **eliminate unsafe practices and accidents** – intrAtrain™ Safety is the solution!

If you are looking for food safety training, be sure to check out our intrAtrain™ Food Safety library.
